DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for priority under 35 U.S.C. 119(a)-(d) based upon an application filed in Taiwan on 12/13/00. A claim for priority under 35 U.S.C. 119(a)-(d) cannot be based on said application, since the United States application was filed more than twelve months thereafter. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Taiwan on 12/13/00. It is noted, however, that applicant has not filed a certified copy of the Taiwan application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bregman et al. (4,080,958).

With respect to claim 1, Bregman et al. shows a blood pumping device comprising: a receptacle (21) including a chamber formed therein, and including a non-valved inlet opening (2, 3, 9), and including a non-valved outlet opening (2, 3, 9), said receptacle including a surface having a peripheral portion and having a port (5, 29) provided therein, a diaphragm (1) received in said chamber of said receptacle and including a space (6) formed therein and including a peripheral portion coupled to said peripheral portion of said surface of said receptacle, and

Art Unit: 3762

means (8) for pumping said diaphragm to draw the blood into said chamber of said receptacle and to pump the blood in said chamber of said receptacle out of said inlet opening and said outlet opening of said receptacle (Fig. 1, 7; Col. 4, lines 28-43; Col. 8, lines 27-55).

Regarding claim 2, Bregman et al. shows the pumping means (8) includes a pump coupled to the port (5, 29) of the receptacle.
